## POPULATION OF CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900.

This bulletin, prepared under the direction of Mr. WILLIAM C. HUNT, chief statistician for population, gives the population of the 159 cities having 25,000 inhabitants or more in 1900, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

The 159 cities combined have a population in 1900 of 19,694,625, as compared with a population for the same of 14,855,489 in 1890, and of 9,933,927 in 1880.

The absolute increase in the population of these cities from 1890 to 1900 was 4,839,136, or 82,426 less than absolute increase from 1880 to 1890, when it was 4,921,562. The percentage of increase in population of the 159 from 1890 to 1900 was 32.5 as against 49.5 from 1880 to 1890.

The combined population of the 159 cities at each of the three census periods is distributed in table 1 by class sizes, giving, in addition, the number of cities included under each class, respectively.

TABLE 1.—POPULATION OF CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900, ACCORDING TO CLASSIFIED SIZES.

As shown by the above summary, there are 19 cities which have 200,000 inhabitants or more in 1900, 19 cities which have between 100,000 and 200,000 inhabitants, 40 cities which have between 50,000 and 100,000 inhabitants, and 81 cities which have between 25,000 and 50,000 inhabitants. There were 124 cities in 1890 which had a population of 25,000 or more, but of these cities Brooklyn and Long Island City now form a part of New York city, showing a net gain of 37 cities in 1900, as compared with 1890. Of the 124 cities in 1890, 16 had 200,000 inhabitants or more, 12 had between 100,000 and 200,000 inhabitants, 30 had between 50,000 and 100,000 inhabitants, and 66 had between 25,000 and 50,000 inhabitants.

In 1880 there were but 20 cities which contained more than 100,000 inhabitants, but in 1890 this number had increased to 28, and in 1900 to 38.

In 1900 there are 78 cities of 50,000 inhabitants or more as compared with 58 in 1890 and 35 in 1880.

The combined population in 1900 of the 19 cities of the first class is 11,795,809 as against a population in 1890 of 8,879,105, representing an increase during the 10 years of 2,916,704, or 32.8 per cent. The same cities showed an increase from 1880 to 1890 of 2,567,452, or 40.6 per cent.

The 19 cities of the first class comprise New York, which, with more than 3,000,000 inhabitants, properly stands by itself; 2 cities, Chicago and Philadelphia, each of which has a population in excess of a million; 3 cities, St. Louis, Boston, and Baltimore, which have a population of half a million each; 5 cities, Cleveland, Buffalo, San Francisco,

Cincinnati, and Pittsburg, which have a population of between 300,000 and 400,000 each; and 8 cities, New Orleans, Detroit, Milwaukee, Washington, Newark, Jersey City, Louisville, and Minneapolis, which have a population of between 200,000 and 300,000 each. The aggregate population represented by each of these 5 subgroups is summarized in table 2.

The 19 cities of the second class have a combined population in 1900 of 2,412,538, and show an increase of 33.3 per cent from 1890 to 1900, as against an increase of 79.2 per cent from 1880 to 1890.

The 40 cities of the third class have a combined population in 1900 of 2,709,338, as against a population in 1890 of 2,067,169, which is equivalent to an increase during the decade of 31 per cent, as compared with an increase of 51 per cent during the preceding ten years.

The 81 cities of the fourth class have a combined population in 1900 of 2,776,940, having gained since 1890 676,381 in number, or 32.2 per cent, as against an increase of 68.7 per cent from 1880 to 1890.

The 19 cities of the first class are the only group of cities which show a larger numerical increase during the past decade than during the ten years from 1880 to 1890, although the four groups show very even percentages of increase from 1890 to 1900, varying from 31.0 to 33.3 per cent, the percentage of increase for the 159 cities combined being 32.5.

Table 3 shows the population of the 159 cities, arranged according to their relative rank in 1900, at each of the last three censuses, together with the increase by number and per cent during the two decades ending in 1890 and 1900, respectively.

<sup>1</sup> Decrease.

Since the announcement through the newspaper press of the population of cities having 25,000 inhabitants or more at the present census, the following changes have been made:

BUFFALO, N. Y.—Population increased from 352,219 to 352,387, owing to an increase in the population of ward 22 from 15,419 to 15,587.

JOLIET, Ill.—Population decreased from 30,720 to 29,353, owing to a decrease in the population of ward 6 from 5,386 to 4,018.

PHILADELPHIA, Pa.—Population of ward 22 decreased from 64,832 to 64,655 and the population of ward 24 increased from 53,023 to 53,200. This makes no change in the total population of the city.

ROCHESTER, N. Y.—Population increased from 162,435 to 162,608, owing to an increase in the population of ward 14 from 9,048 to 9,221.

ST. PAUL, MINN.—Population decreased from 163,632 to 163,065, owing to a decrease in the population of ward 11 from 5,047 to 4,480.

YORK, Pa.—Population increased from 33,654 to 33,708, owing to an increase in the population of ward 12 from 4,540 to 4,594.

As shown by table 3, New York, under the act of consolidation which became effective January 1, 1898, has grown to be a city of very nearly 3,500,000 inhabitants in 1900, as compared with a population for what was formerly New York city of a little more than 1,500,000 in 1890, and of substantially 1,200,000 in 1880. The population of the territory now comprised within the present limits of New York was, approximately, 2,500,000 in 1890 and 1,900,000 in 1880. It is the premier city of the country in point of population, a position which it has uniformly held at each decennial census since and including 1790.

Chicago, with practically 1,700,000 inhabitants, and Philadelphia, with not quite 1,800,000 inhabitants, hold the second and third places in 1900, the same as in 1890, although at the census of 1880 their positions were reversed, Philadelphia then having very nearly 850,000 inhabitants as compared with not much more than 500,000 for Chicago.

St. Louis, Boston, and Baltimore, the next largest cities, have not changed their rank in 1900 as compared with 1890, and each of these three cities now has a population somewhat in excess of half a million. Boston was the fourth city in rank in 1880, but was passed by St. Louis in 1890, while Baltimore has occupied the sixth place at each of the three census periods considered.

Cleveland and Buffalo have both increased materially in population during the last ten years, and now take precedence over San Francisco and Cincinnati, which in 1890 were the seventh and eighth places in point of population. Pittsburg also shows a large increase in population since 1890, and is now the eleventh largest city in the country, having exchanged places with New Orleans.

Among the most notable changes in the rank of cities which have taken place in 1900, as compared with 1880, may be mentioned that of Seattle, which has advanced from the 150th to the 48th place; that of Los Angeles from the 135th to the 36th place; that of Duluth from the 156th to the 72d place; that of Kansas City, Kans., from the 153d to the 76th place; and that of Portland, Oregon, from the 106th to the 42d place. Other noticeable changes in rank from 1880 to 1900 are Birmingham, from 154 to 99; Tacoma, from 155 to 103; Spokane, from 157 to 105; Dallas, from 137 to 88; and Saginaw, from 136 to 89.

The total population represented by the 159 cities is distributed by states in table 4, as follows:

The following named states and territories in 1900 do not contain any city with a population of 25,000 or more: Arizona, Idaho, Indian Territory, Mississippi, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, South Dakota, Vermont, and Wyoming.

Of the whole number of cities having 25,000 inhabitants or more in 1900, 70 are found in the North Atlantic division, 48 in the North Central division, 18 in the South Central division, 12 in the Western division, and 11 in the South Atlantic division. Massachusetts has the largest number of such cities, namely, 20, and is followed by Pennsylvania with 18 and New York with 12.

The most significant growth of cities, shown by the above table, is that for the three cities in the state of Washington, namely, Seattle, Spokane, and Tacoma. These three cities combined had only 4,981 inhabitants in 1880, but their population had increased to 98,765 in 1890, and to 155,233 in 1900, the increase during the past decade being equivalent to 57.1 per cent.

Nebraska is the only state in which the combined population of the cities contained therein shows a decrease from 1890 to 1900.

Of the total population represented by the 159 cities in 1900 (19,694,625), 10,098,696, or 51.3 per cent, is contained in the 70 cities situated in the North Atlantic division, and 6,071,861, or 30.8 per cent, in the 48 cities situated in the North Central division, leaving only 3,524,068, or 17.9 per cent, for the remaining cities situated in the other three geographical divisions.

Table 5 shows the population of each city having 25,000 inhabitants or more in 1900, arranged by states, giving in each case the population by wards or equivalent subdivisions.

As already stated, Brooklyn and Long Island City are included as a part of the territory now comprised in what is commonly known as Greater New York, the area of New York city having been materially increased under the act of January 1, 1898, by which Kings county, coextensive with the city of Brooklyn, Richmond county, and the larger part of Queens county became a part of that city.

The city of New York in 1890 comprised all of what is now the borough of Manhattan and all of what is now the borough of Bronx, except the territory lying to the west of the East river annexed on January 1, 1898.

Under the act of 1894 the towns of Flatbush, Flatlands, Gravesend, and New Utrecht were absorbed by the city of Brooklyn, the town of Flatbush becoming the 29th ward, the town of New Utrecht the 30th ward, and the towns of Flatlands and Gravesend the 31st ward of the city. The city thus became coextensive with Kings county, and on January 1, 1898, the city of Brooklyn became the borough of Brooklyn, one of the five boroughs of Greater New York.

Richmond county, or what is commonly known as Staten Island, under the provisions of the same act became the borough of Richmond, and Queens borough was also organized from what was Long Island City, the towns of Flushing, Jamaica, and Newtown, and a small portion of the town of Hempstead, all of which were civil divisions of Queens county. The remaining towns of the county, Oyster Bay, North Hempstead, and the greater part of the town of Hempstead, were taken to form the new county of Nassau. The 1st ward of Queens borough comprises what was formerly Long Island City, the 2d ward what was formerly Newtown town, the 3d ward what was formerly Flushing town, the 4th ward what was formerly Jamaica town, and the 5th ward that part of Hempstead town included in the borough of Queens. It is impossible to state definitely the population in 1890 of that part of the town of Hempstead taken into the borough, but in order to determine, approximately, the population in 1880 and 1890 of the area included within the present limits of the borough of Queens, it can be assumed that one-fifth of the population of the town of Hempstead was contained in that portion of the town now comprised within the borough.

Table 6 shows the results for the five boroughs comprising Greater New York, including a statement of the approximate population for the same areas in 1880 and 1890, and the increase for each borough during the last two decades.

TABLE 6.—POPULATION OF NEW YORK CITY BY BOROUGHS: 1880 TO 1900.

As shown by the above summary, the boroughs of Manhattan and Bronx, or what was formerly New York city, increased 35.3 per cent from 1890 to 1900, as against an increase of 25.6 per cent from 1880 to 1890. The percentage of increase in Brooklyn borough was substantially the same from 1890 to 1900 as in the ten years preceding, being 39.1 per cent and 39.8 per cent, respectively, while Richmond borough increased 29.6 per cent from 1890 to 1900 and 32.5 per cent from 1880 to 1890. The largest percentage of increase is shown in Queens borough, which increased 75.7 per cent from 1890 to 1900, as against 53.9 per cent from 1880 to 1890.
